Why&Who Participate?

History has shown that new industries always emerge from the deep integration of advanced technology, finance, industries and commerce, leading technological innovation and industrial development.

Powered by science and technology, emerging industries have gained momentum in the battle against economic crisis and become new economic growth area. They will not only drive the economy out of recession but also spur a new round of prosperity.

Led by developed countries, emerging industries will be the focus of global industrial restructuring, industrial transfer and technology transfer.

Future leader in global economy will no doubt be green industries such as new energy, new material, microelectronics, biotechnology, telecommunication, etc.

SUMMIT AIMS

- To promote information and technology exchange of emerging industries;
- To strengthen international economic cooperation within each emerging industry;
- To provide global investment opportunities of emerging industries for enterprises;
- To reflect on successful development model of emerging industries in different countries and regions;
- To explore effective ways of intellectual property rights protection and brand development for emerging industries.

MAIN PARTICIPANTS

- Political Figures Worldwide;
- Leaders from Fortune 500 companies, Forbes 2000 companies and other outstanding listed companies from all over the world;
- Leaders from industry-leading companies within world emerging industries;
- Ministers, congressmen, governors, mayors and etc. from relevant countries;
- Renowned economists, experts and scholars;
- Chiefs from famous international organizations and industry associations.

Vice Premier of
China

Li Keqiang
Vice Premier of
China

Li Keqiang, Vice Premier of China met with Dominique de Villepin, former French Prime Minister and Global Chairman of APCEO at the 5th ICS 2009 held by APCEO.

Emerging Industries in China

- Premier Wen Jiabao presided over three meetings on Sept 21st and 22nd, 2009 which set it an important economic strategy to develop emerging industries.
- The meetings concluded with specific goals to make the shift from a resource-oriented economy to a green economy that relies on science and technology progress, quality workforce and innovative management.

- By 2020, China's output in the entire biology industry will reach RMB 2.5-3 trillion.
- The new energy sector has enormous potential. The annual output of energy generated from renewable energy resources equals that from 7.3 billion tons of standard coal and there is huge room for improvement. China tops the world in the coverage of solar energy collectors and ranks second in terms of wind power installed capacity, reaching 20 million kilowatts in 2009.
- China's investment on environment protection in the 12th five-year plan will be around RMB3.1 trillion.
