Dear Colleagues,

I am writing to let you know that the Australian chemical company, Orica has lodged an application to send their 22,000 tonnes of the hazardous POPs waste, hexachlorobenzene to Denmark for incineration. They are doing this as it looks as if they will lose their legal appeal to be allowed to send it to Germany.

I've attached our press release and would be happy to help in anyway to ensure the waste is treated in Australia.

If you would like some background to this long running issue, visit our website [www.ntn.org.au](http://www.ntn.org.au) and follow the links to the 'toxic waste' campaign or simply do a site search on HCB.

Look forward to hearing from you,

Regards Mariann
