**Cc:** Rothenfluh, Daniel; Reville, Barry  
**Emne:** Orica Update [SEC=UNCLASSIFIED]

**Prioritet:** Høj

**Vedhæftede filer:** Attachment A Vessel Specs.doc; Sea transport extra information 060509.doc; AUH086637O.pdf; AUH086937R.pdf; AUH082037T.pdf

Dear Lone,

Thank you for your recent email regarding the Danish EPA's assessment of Orica's export applications and your mention of some missing information in the notification forms with regard to the transport.

As you are getting closer to finalising your assessment, I thought it would be appropriate to provide you with:

- (i) the current status of Orica's transport arrangements, including a typical specifications for the type of vessel to be used;
- (ii) the detailed information regarding the sea transport; and
- (iii) copies of signed documents from the South African competent authority agreeing to the transit.

In the meantime, Orica has confirmed to us that they will only be able to provide the name of the carrier following a final decision being made in Denmark and Australia, and approximately 6 weeks before despatch of the shipment from Australia (i.e. when the actual ship is ordered). It would be greatly appreciated if you could please confirm that this will not pose any problems for the Danish EPA with regards to processing Orica's notification forms?

If this is the case, I understand that the processing of the notification forms can occur immediately following a decision being made on the DRR, and that this approval for import to Denmark, with whatever conditions you apply, may be granted within days of notify us of your decision to accept the applications?

If there is any additional information which you require to process the notification forms could you please advise me and I will have this information provided to you as a priority.

Please let us know if you need additional information.

Best regards

Damien

## **Sea Transport – HCB Waste to Denmark, Kommunekemi a/s, Nyborg**

Orica have indicated in their application documents that details of the sea transport carrier can only be finalised once final approval for export has been granted by the Australian Competent Authority, the Department of the Environment, Water, Heritage and the Arts.

Therefore, the application documentation supplied to the Danish Environmental Protection Agency do not contain details for the sea transport carrier in the movement tracking form and notification form.

The following details have been supplied to the department by Orica in their application documents:

### ***Sea Transport***

The contractor arranging sea transport has extensive international experience in transporting hazardous waste including POPs, and consequently, will contract ships suitable for the transport of HCB waste.

Ships chartered for the transport of the HCB waste will only carry HCB waste which will prevent the contamination of any other cargo. It is proposed that the majority of containers will be stored under deck which will reduce the risk of losing a container overboard during high seas. Containers will only be stored on deck where required by law. This will apply to a limited number of iso-containers which will be used for transport of liquid waste.

All ships used will also be certified to the International Safety Management Code (2002) ("**ISM**C 2002"), which provides an international standard for the safe management and operation of ships and for pollution prevention. Under the ISMC 2002, charter ships are required to maintain a safety management system, which, among other requirements, specifically includes "*instructions and procedures to ensure safe operation of ships and protection of the environment in compliance with relevant international and flag State legislation .... and procedures to prepare for and respond to emergency situations.*"

The HCB waste is also classified under the International Maritime Dangerous Goods Code ("**IM**DG"). The IMDG provides specific instructions for the storage of the HCB waste and emergency response requirements.

In addition, the following is also supplied by Orica;

Orica have specified the types of vessels to be used for this activity, with the specifications included in Appendix III. The vessel to be used will be a Lloyds or appropriately registered vessel. The Lloyds register provides appropriate standard for the design, construction and ongoing maintenance of all vessels. By requiring a Lloyds classification Orica ensure the ship is maintained and operated in accordance with these standards.

Appendix III is at **Attachment A**.

Dear Ms Jakobsen

**NOTIFICATION FOR THE TRANSBOUNDARY MOVEMENT OF WASTE: Notification No.: AUH 082037T**

The Department of Environmental Affairs and Tourism (DEAT) as the competent authority for the implementation of the Basel Convention on the Control of Transboundary Movement of Hazardous Waste and their Disposal in South Africa, has received a request from Oricca Australia (Pty) Ltd Australia to transport 5000 tons of HCB and chlorinated wastes containing HCB to Kommunekemi a/s in Denmark for final disposal. The waste will be transported in 2 shipments to Kommunekemi a/s in Denmark for disposal between 28 February 2009 to 27 February 2010.

Having considered the supporting documents, the Department of Environmental Affairs and Tourism, on behalf of the South African government does not object to the transiting of the waste through South African waters on the following conditions:

- The waste is not removed from the containers ;
- The containers do not leave the export area of the port ; and
- The containers are not unloaded for a period in excess of two weeks.

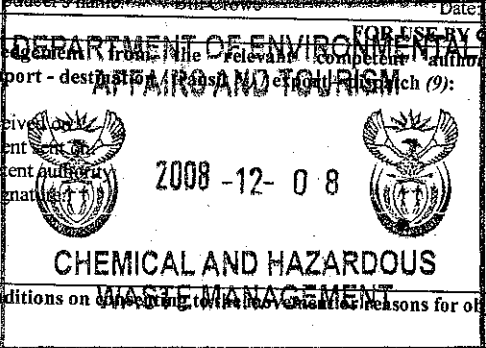

Yours faithfully

Ms. D Fischer  
Director: Waste Stream Management  
Department of Environmental Affairs and Tourism

Dear Ms Jakobsen

**NOTIFICATION FOR THE TRANSBOUNDARY MOVEMENT OF WASTE: Notification No.: AUH 086937R**

The Department of Environmental Affairs and Tourism (DEAT) as the competent authority for the implementation of the Basel Convention on the Control of Transboundary Movement of Hazardous Waste and their Disposal in South Africa, has received a request from Oricca Australia (Pty) Ltd Australia to transport 800 tons of construction and demolition wastes (including mixed wastes) containing HCB to Kommunekemi a/s in Denmark for final disposal. The waste will be transported in 2 shipments to Kommunekemi a/s in Denmark for disposal between 28 February 2009 to 27 February 2010.

Having considered the supporting documents, the Department of Environmental Affairs and Tourism, on behalf of the South African government does not object to the transiting of the waste through South African waters on the following conditions:

- The waste is not removed from the containers ;
- The containers do not leave the export area of the port ; and
- The containers are not unloaded for a period in excess of two weeks.

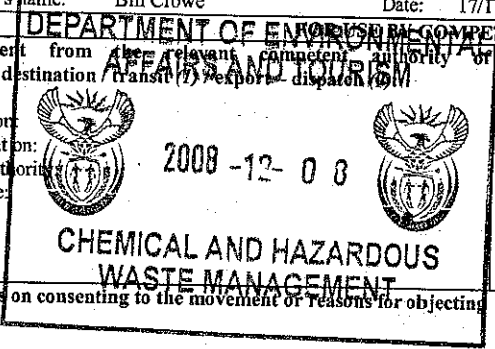

Yours faithfully

Ms D Fischer  
Director: Waste Stream Management

Dear Ms Jakobsen

**NOTIFICATION FOR THE TRANSBOUNDARY MOVEMENT OF WASTE: Notification No.: AUH 0866370**

The Department of Environmental Affairs and Tourism (DEAT) as the competent authority for the implementation of the Basel Convention on the Control of Transboundary Movement of Hazardous Waste and their Disposal in South Africa, has received a request from Orica Australia (Pty) Ltd Australia to transport 300 tons of crushed packaging, contaminated with HCB and chlorinated wastes to Kommunekemi a/s in Denmark for final disposal. The waste will be transported in 2 shipments to Kommunekemi a/s in Denmark for disposal between 28 February 2009 to 27 February 2010.

Having considered the supporting documents, the Department of Environmental Affairs and Tourism, on behalf of the South African government does not object to the transiting of the waste through South African waters on the following conditions:

- The waste is not removed from the containers ;
- The containers do not leave the export area of the port ; and
- The containers are not unloaded for a period in excess of two weeks.

Yours faithfully

**Ms. D Fischer**  
**Director: Waste Stream Management**  
**Department of Environmental Affairs and Tourism**

Date: 8/12/2008
