Subject: HCB

Dear Damien,

Even with good intentions it now and then is not possible to reach one and each other by phone, so we try by mail.

When we inform our minister about the Danish EPA's decision we would like to include a paragraph in the note about the legal and political process which has been going on in Australia with regard to this notification.

What we are thinking of is something about the process in connection with the SIA report and the approval of sending the duly motivated request to the Danish EPA. And the legal process in accordance with your regulation – who accept what at which time?

Can we be sure that your minister will say yes to the notification if you get a yes from Denmark? And has he made a public statement to that effect, which we can refer to when informing our minister of our planned decision?

Best regards
Dorte and Lone
