Emne: Climate change

Servants of the people: Forget all the Nonsense from the climate neanderthals doing the manmade green ether CO2 to the enemy of a climate doing wellbeing for mankind. The real enemy causing bad climate for mankind is here: The COLD – initiated by the sun, solar cycle 23 minimum 2001

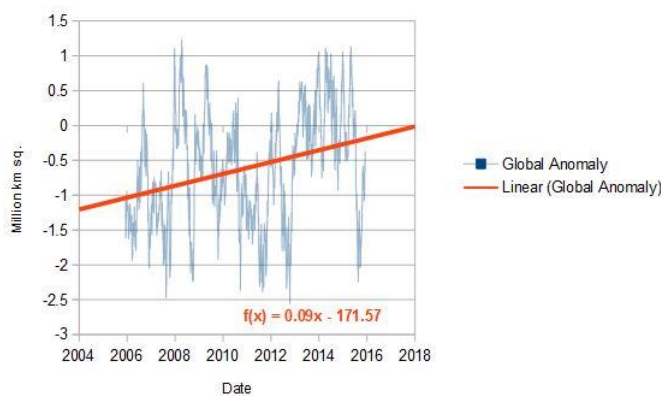

September 2014 Antarctic sea ice extent exceeded 20 million km² for the first time since 1979. According to the National Snow and Ice Data Center. After three record high extent years, 2015 marks a temporary little decline because of a strong EL Niño event, a natural phenomenon

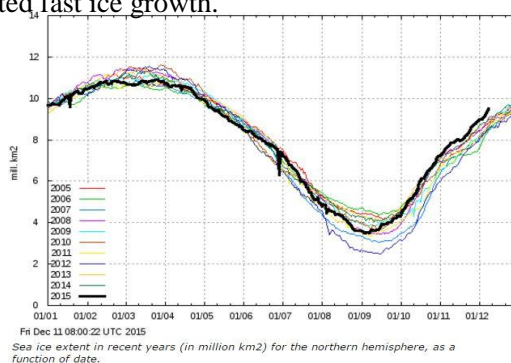

Massive increase in global sea ice area over the last decade, beginning **2001 according to solar cycle 23 MNIMUM.**

Since 2005 the amount of sea ice on earth has grown about the area of California and France combined.

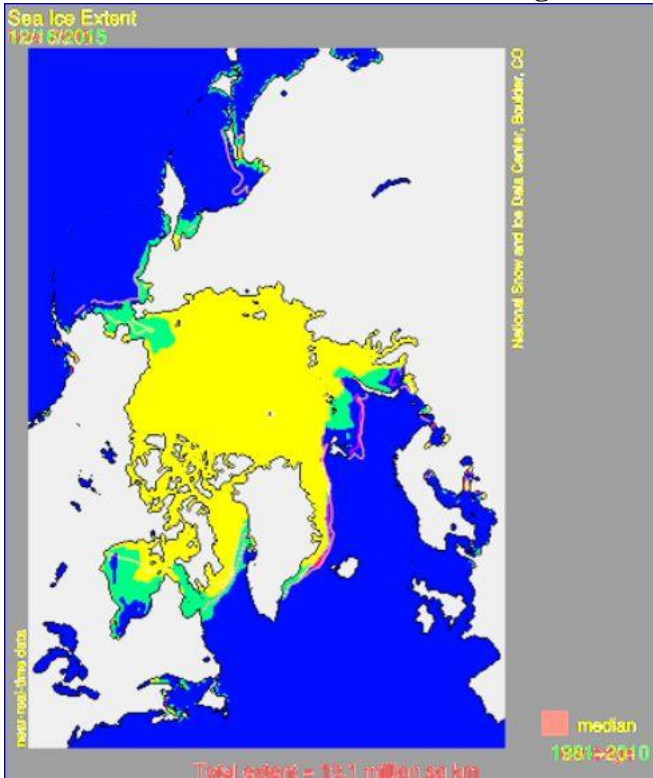

Global Sea Ice Area Anomaly

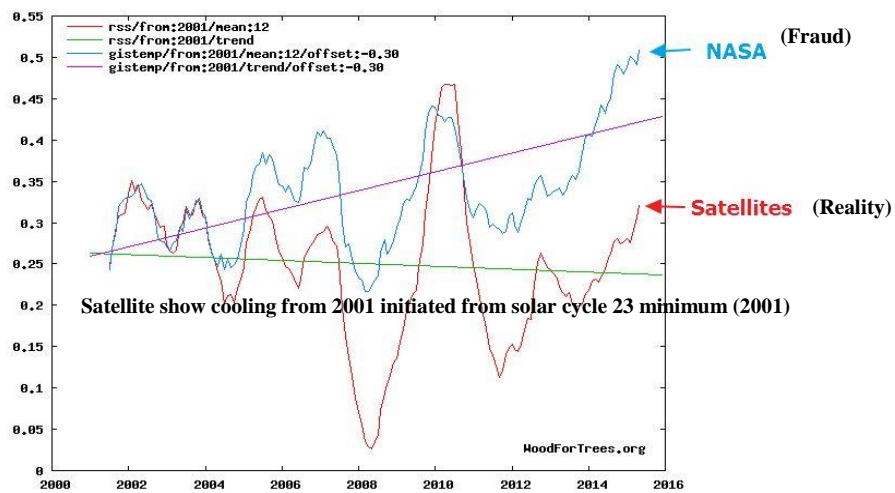

On the last day of COP 21 in Paris the Arctic is giving the Climate neanderthals the finger with unprecedented fast ice growth.

Sea ice extent 12/18/2015 Green shows growth since the September minimum

Global temperature NASA vs Satellite

The greenhouse effect show no warming in the troposphere according to satellite / balloons measurements, therefore NASA's claims of record warming due to the greenhouse effect are pure deceit.
