Spørgsmål 84

Er ministeren enig i de synspunkter, som Schweiz' repræsentant til FN giver udtryk for i FN nyheden "Pointing to "Cycle of Violence", Senior UN Official Urges Restraint Following Air Strikes in Yemen" fra 12. januar 2024, hvor der står: "Switzerland's delegate recalled that, under the resolution, Member States' right to defend their vessels is strictly limited to military measures to intercept attacks against merchant vessels and warships to protect them and the persons on board. Noting that any military operation that goes beyond this immediate protection would be disproportionate — and not covered by the resolution — he voiced concern over the military strikes, jf. <https://press.un.org/en/2024/sc15565.doc.htm>.

Spørgsmålet er stillet efter ønske fra Christian Friis Bach (RV).
