Statement of the Egypt Parliament Abroad on the systematic international disregard for President Mohamed Morsi's right to life

On Dec. 28, 2017 Qatari newspaper (Al-Sharq) issue no. 10787, published a distress that is not the first of Mr. Mohammad Al-Damati defense lawyer of president Dr. Mohammad Morsi, who frankly stated that his client was being subjected to physical liquidation.

President Morsi has declared before, in front of his judge, what he considered a fear for his own life and an attempt of deliberately and slowly killing him by preventing food and medication, as his family and lawyers declared before, which undoubtedly confirms that his life is in real danger. This is considered a systematic and premeditated crime of a coup regime that is obsessed with revenge of every opinion holder and advocate of the values of democracy after the elimination of the state of law.

The international community has met those threats to the life of President Mohamed Morsi with great disregard and without a movement aimed at protecting him and the Egyptian human rights system.

The international conscience has already moved for the sake of the Yazidi girl and others and it is silent towards the crimes of the coup against humanity to confirm the manipulation of the human values with interests and the loss of conscience and morals.

The international conscience is called upon to take more decisive positions towards defending President Mohamed Morsi and to combat violations, not just to establish positions, for history will be the arbiter who will inflict shame on those who disregard human rights.
