

**Amendment to Statement of Intent between the Danish government and Airbnb
on the reporting of hosts' rental income dated November 21, 2018**

It has been deemed necessary by both parties to clarify further technical details which were not expected. Therefore, the parties agree that Airbnb's commitment to data sharing refers to all bookings made as of July 1, 2019, provided the final piece of legislation (L188 "Forslag til lov om ændring af lov om sommerhuse og campering m.v., lov om midlertidig regulering af boligforholdene og byggeloven") will pass in April 2019.
