

I write this email to the Danish Parliament house because of an unjustified and unfair decision which is out of the international human rights and out of the human dignity for a woman's right in this 21st century we are living. A law in a democratic country is set by principles and rules to make life better and easier for the citizens and to the residents of a country. And the foundation of laws and rules is based on to deliver justice to every single individual regardless of culture, race, color, sex, religion and ethnical background. That is what laws command us to follow, in fact not to misuse laws by disgrading our fellow citizens and make life more and more miserable for them. If that is the case and meaning of law making, then why still I as a permanent resident of this free land Denmark can not be given justice, though I am self a man of principles and rules?

With all my heart and blood I respect to support and abide by genuine laws and rules that brings me justice and peace, not hatred and hate and discrimination of my being in this country. The decision which the Danish Immigration Service has taken on my wife's application for family re-unification is entirely biased and full of prejudice which can eventually lead to a family disaster and separation of a mother from a two years old child who is already a part of this society, my child has just started to get and give love to her father and her mother and those children and teachers who are with

her in the kindergarten. And my child Sofia has the Danish permanent residence.

Let me put this forward :

Is it a law that separates a wife from a husband without knowing what consequences it will bring on me and my wife who is already shattered by losing her family in Afghanistan?

Is it a law that sends a lonely and a desperate woman alone back to a place where her life is 101% in absolute danger and to a place where there is no personal authority for a woman or even more simply no right for a woman to live freely? And you all know better and most clearly about the life circumstances for a lonely woman in Afghanistan than any one else!

Is that a law that brings this injustice and torture physically and psychologically a man like me myself who has always contributed to this society day in and day out. And still doing my job to support my economy and to help my family to be happy?

No, no, no I don't agree on this that this is the genuine law of this free land!! That brings all these consequences on our lives. And It is not totally fair what is being done to me!

This is a question of mentality and wrong judgement. This is a question of human ignorance and hatred. This is a question of less sympathy for the human race.

I deeply believe in laws and conditions for every aspect of life as long as they do not destroy a persons's life and give us misery.

On the decision letter from the Danish Immigration Service it explained as follows below:

Reasons for the decision

You do not have a legal basis for staying in Denmark and you did not provide information about any exceptional circumstances that, based on Denmark's international obligations, can provide reason for you being allowed to apply in Denmark.

Let me ask this that what could have a more legal basis for staying in Denmark than taking care of my two years old child who desperately needs a mother by its human right and nature?

Here is below a short briefing that Denmark has considered about the Danish International obligation about women rights:

“Denmark considers human rights to be a precondition for and an integrated part of international law. Denmark reconfirms respect for human rights regardless of migratory status and fully supports the principle of non-discrimination of refugees and migrants as well as the fundamental rights of these groups such as rule of law, protection and security. Denmark similarly supports that all human rights and international law must be respected when it comes to migrants arriving in Denmark. Denmark attaches particular attention to gender equality, including women’s and girls’ sexual and reproductive health and rights.”

Please, let me make myself clearer that I am one of those residents in Denmark who has been more thankful to the help and favour which Denmark has bestowed upon me.

When I first came to Denmark in 2010, Literally I was like a new toddler who tries to learn to walk and take his/her new steps in life, because of a sudden change of location, social and cultural change. Before coming or reuniting with my father here in Denmark, I was enough matured and enough principled to set my life apart from the good and bad in spite of living my life without my father in a critically war zone like Afghanistan for a long time. So it was here the

people, the kind citizens of this land that took my hand and they helped me from all the bottom to the top for up to 2 years till I was able to stand and find a way to support my life financially.

Last but not the least, I beg every singular administrative part of the Danish Parliament to let me protect my family in peace and in a family harmony and serve Denmark as a normal citizen of this free country. And I beg the Parliament where the hope of all we citizens of this country is with to coordinate about my family re-unification application with The Danish Immigration Service.

And if there is any chance of getting in touch with me face to face, I will be **very very** much **glad** to see you and put my current status or issue in discussion with you in details.

Thank and regards
