Aalborg 10. April 2020

To whom it might concern

I shall hereby confirm that I have worked together with Olav Lange Hansen since 2016. It includes a one-year part time position as field researcher in the Division of Transportation Engineering at Aalborg University in 2017-2018. He worked in the EU-funded project G-PaTRA about green rural mobility.

The two main tasks he carried out as part of the work was a field study concerning carpooling in different environments in the United States and a dedicated focus on initiation of carpooling activities in Danish villages.

His work-related strengths are that he is very dedicated on the work task he has to solve. Also, he has very good skills regarding involving and mobilization of citizen groups to work in new, greener ways with special focus on the bottom-up approach. Furthermore, he has collected an incomparable knowledge of real time involvement and up start of rural mobility solutions.

When it comes to knowledge about mobilization and involvement in solutions in a rural content, I give Olav Lange Hansen my best recommendations.

With best regards,
