

**To: Members of the European Parliament
Members of international organizations and
their parliamentary assemblies
Members of the national parliaments of the
world**

**Address to the European Parliament, international organizations and their
parliamentary assemblies, national parliaments of the world on the urgent
need to protect Ukraine's civilian population from armed aggression by
Russian invaders**

**Dear Members of national parliaments!
Dear Members of the European Parliament!
Dear friends!**

Ukraine has sent a number of requests to the UN High Commissioner for Refugees and the Red Cross to ensure the humanitarian corridor (post) for the delivery of medicines, medical equipment, humanitarian assistance, evacuation of the civilian population (children), unimpeded passage of specialized and cargo transport, which will provide logistics for the delivery of goods to healthcare facilities that treat victims and those wounded by shelling.

The Russian Federation must ensure that humanitarian aid, medical assistance and supplies, as well as deliveries of food, reach without hindrance all those for whom they are intended, especially the most vulnerable people, including the elderly, women, children and the disabled persons. To ensure this, humanitarian corridors must be established and secured to avoid any disruption to essential services such as water, food, power and healthcare.

Today, several healthcare facilities are in complete or partial isolation due to direct war actions or due to the destruction of infrastructure, namely in:

- Sumy region (Sumy city, Shostka, Romny, Konotop, Okhtyrka directions);
- Chernihiv region (east and north);
- Kharkiv region (the whole region, except for the south-eastern part);
- Kyiv region (Bucha, Vyshgorod, Ivankiv, Vasylkiv, Irpin, Hostomel directions);
- Mykolaiv (Bashtanka, Snihurivka, Bereznehuvate directions);
- Zaporizhzhya region (Tokmak, Berdyansk, Velyka-Bilozerka directions);
- Donetsk region (Volnovakha district);
- Luhansk region (north);
- Kherson region (Chaplinka, Kalanchak, Henichesk and Nova Kakhovka districts).

Yesterday and today we agreed with the Russian side to establish "green corridors" for the most vulnerable groups: women, children, the elderly in Mariupol, Volnovakha, as well as Kharkiv through a neutral intermediary - the International Committee of the Red Cross

Unfortunately, Russian troops begin shelling as soon as the evacuation begins and thus violate all agreements.

We, the Members of the Parliament of Ukraine, are also ready to act as guarantors of the security of humanitarian corridors, we are ready to accompany transport with the civilian population.

In this regard, we appeal to you, in case if you are ready, to come to Ukraine and together with us to ensure the security of the evacuation process of the civilian population of Ukraine together with us.

With kind regards,

Ukrainian delegation to the NATO PA
