Invitation to cybersecurity visit in Tallinn, Estonia

May 2023

Discover why and how Estonia became global leader in cybersecurity, when [Estonian Embassy in Copenhagen](#) and [Estonian Business and Innovation Agency in Denmark](#) (Enterprise Estonia) are arranging a networking visit to Estonia in May 2023. We will visit cybersecurity organizations and explore Estonia's strategy on how to prevent and handle cyberattacks.

The most advanced cyber security country in Europe (3rd most secure country on the Global Cybersecurity Index), Estonia has unique expertise in the research, development and management of cyber security solutions and systems. Home to NATO CCDCOE, Guardtime and Malwarebytes, Estonia is trusted to keep the digital economy safe.

As cybercrime becomes a significant factor in client relationships, business valuation and even national security, Estonia's unique blend of expertise and environment provides the ideal platform for the research, development, and management of cyber security solutions.

With solid investments in its cyber security infrastructure, Estonia has developed extensive expertise in this area, becoming one of the most recognized and valued international cyber security experts.
