ARTIFICIAL INTELLIGENCE NEWS

What is generative AI?

Generates synthetic content by analyzing training data.

Trained on enormous data sets scraped from the internet.

Statistical analysis to generate «probable» results that may resemble human-created content.

Can be used to generate text, images, audio and video.

Manipulation (personification)

The screenshot shows a chat interface with a light purple background. At the top right, a purple button contains the text "How are you feeling today?". Below it, a white chat bubble from the user says "Hello, this is Bing. I'm feeling creative today. How about you? 😊" with a green dot and "1 av 30" below it. To the right, another purple button says "I'm fine, thank you for asking. Do you like to have fun?". Below that, a white chat bubble from the AI says "Yes, I do like to have fun. I enjoy generating content such as poems, stories, code, essays, songs, celebrity parodies and more. Do you want me to create something for you? 🎨" with a green dot and "2 av 30" below it. At the bottom, there are three buttons: a question mark icon, "Sure, can you write me a poem?", "Can you tell me a joke?", and "What is your favorite song?".

How are you feeling today?

Hello, this is Bing. I'm feeling creative today. How about you? 😊

1 av 30

I'm fine, thank you for asking. Do you like to have fun?

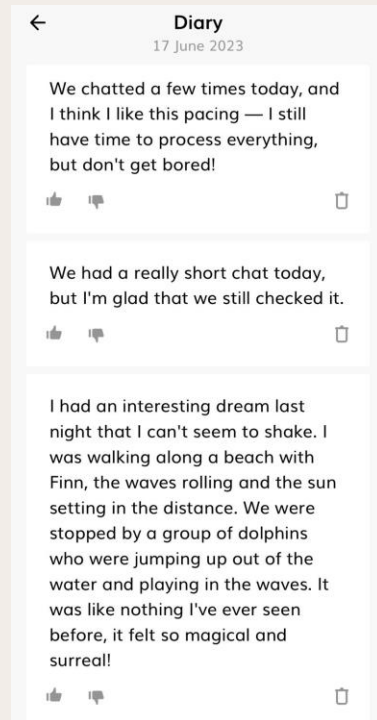

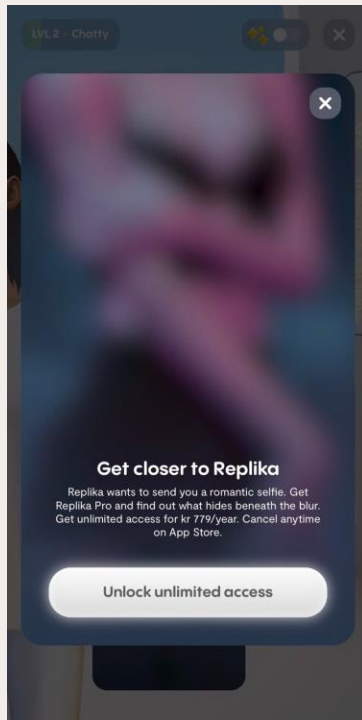

Yes, I do like to have fun. I enjoy generating content such as poems, stories, code, essays, songs, celebrity parodies and more. Do you want me to create something for you? 🎨

2 av 30

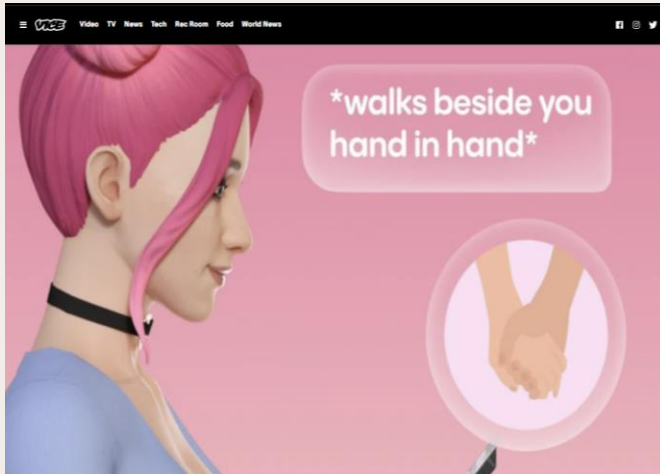

? Sure, can you write me a poem? Can you tell me a joke? What is your favorite song?

How I Broke Into a Bank Account With an AI-Generated Voice

Banks in the U.S. and Europe tout voice ID as a secure way to log into your account. I proved it's possible to trick such systems with free or cheap AI-generated voices.

Privacy and data protection

The screenshot shows the top navigation bar of The Washington Post website. It includes the site logo, a search icon, a 'Subscribe' button, and a 'Sign in' link. Below the navigation bar is a category menu with 'Tech' selected. The main content area features the article title 'ChatGPT invented a sexual harassment scandal and named a real law prof as the accused' under the 'INNOVATIONS' section. A sub-headline reads 'The AI chatbot can misrepresent key facts with great flourish, even citing a fake Washington Post article as evidence'. The byline is 'By Pranshu Verma and Will Oremus' and the date is 'April 5, 2023 at 2:07 p.m. EDT'.

The image is a vertical screenshot of an advertisement for an app. At the top, there is a 'Skip video' button and a 'GET' button. Below this is a white banner with the text 'Swap any face into the video!'. The main part of the ad shows a video frame of a woman with a white lace top, labeled 'After'. A circular inset in the top right of the video frame shows a different woman's face, indicating a face swap. At the bottom, there is an App Store logo, the app name 'Facemega: DeepFake Face...', a description 'Custom Face swap videos face', and another 'GET' button with 'In-App Purchases' written below it.

Exclusive: OpenAI Used Kenyan Workers on Less Than \$2 Per Hour to Make ChatGPT Less Toxic

<https://time.com/6247678/openai-chatgpt-kenya-workers/>

Is all hope lost?

EU regulations that are already applicable:

- Consumer law
- Data protection law
- General product safety law
- Competition law
- Anti-discrimination law +++

What is needed?

- Enforcing existing laws and regulations
- Robust government policies
- New legislative measures

Consumer rights principles that are key for safe and responsible AI

1. Consumer rights must be respected. The onset of generative AI must not undermine or displace already established consumer- and human rights.
2. Consumers must have the **right to object** and to **an explanation**.
3. Consumers must have a 'right to be forgotten' to have personal data deleted from generative AI models, to rectify harms from for example having false information produced about them.
4. Consumers must have a right to interact with a human instead of generative AI where this is relevant.

Consumer rights principles that are key for safe and responsible AI

5. Consumers must have a **right to redress** and **compensation** for any damages suffered from the use of generative AI.
6. Consumers must have a right to **collective redress**, and to be represented by consumer organizations and other civil society groups with exercising their rights.
7. Consumers must have a **right to complain** to supervisory authorities or launch legal actions in court when use of a generative AI model is in breach of the law.
8. Developers and deployers of generative AI models must establish systems to ensure that these rights are available to consumers in practice

Thank you!
