Emne: On the abuse of power and corruption in the Danish government

Dear

This July, I passed through Denmark from Sweden, and my destination was Germany. However, at the last stop before arriving in Germany, the Danish railway station, I was detained in Denmark because I had no documents.

After that, we were detained in the Copenhagen foreign detention center in Denmark for one and a half months.

We were subjected to corruption and abuse of power in the Copenhagen foreign detention center.

I will talk about two aspects below.

The foreign detention center has always provided us with refrigerated food. These refrigerated foods have been refrigerated for at least one month, and we eat them twice a day, at noon and in the evening.

The following is the cover of the refrigerated food we ate every day in the Copenhagen foreigners' detention center. This kind of refrigerated food is only suitable for emergency needs and short-term consumption. We were forced to eat it for a long time, and we vomited every day because of the food.

Although we protested many times, the personnel at the detention center for foreigners said that this was the food the Danish government gave us and they had no problem with it.

Also, when we protested, he claimed that the Chinese people being abused in Denmark were more humane than the Chinese government's treatment of the Chinese people, in order to justify his abuse of me.

On the other hand, our freedom was restricted in the Copenhagen foreign detention center. However, the responsible department of the Immigration Bureau neglected the deportation procedure for no reason. It took six weeks to deport people from Denmark, which could have been deported in three weeks.

The relevant departments of the Immigration Bureau did not initiate the deportation procedures for a long time, or after completing their own procedures, they kept the documents in their own offices and did not transfer them to the next department. This doubled our detention time.

Our bodies and minds have been seriously damaged by the corruption and abuse of power in this foreign detention center in Copenhagen, Denmark.

I am making a complaint here and ask you to investigate and deal with the corruption and abuse of power.

I also hope that you can arrange a lawyer to help me.

Best regards!
